RE: Paleontological File Search and Recommendations for UDOT Project No. HPP-LC05(29); 200 East Minor Arterial, Logan Project, Cache County, Utah  
U.C.A. 63-73-19 compliance; literature search for paleontological specimens or sites

Dear Sheri:

I have conducted a paleontological file search for the Logan 200 East Minor Arterial Project in response to your letter of June 14, 2007. This project qualifies for treatment under the UDOT/UGS executed Memorandum of Understanding.

There are no paleontological localities recorded in our files for this project area. Quaternary and Recent alluvial deposits (Qay) that are exposed along most of this project right-of-way have a low potential for yielding significant fossil localities. However, there may also be exposures of Lake Bonneville deposits (Qlts, Qltg), which have the potential for yielding significant vertebrate fossil localities. Please be aware of possible impacts to paleontological resources if these deposits are disturbed as a result of construction activities. Unless fossils are discovered as a result of construction activities, this project should have no impact on paleontological resources.

If you have any questions, please call me at (801) 537-3311.

Sincerely,

Martha Hayden  
Paleontological Assistant
