

Trenton 1600 South Proposal

September 18, 2017

Overview

Continuation of the road improvements made through Amalga Town which stopped at the Trenton Town boundary. This Amalga project was completed 3 years ago

Amalga/Trenton Project Details

| Amalga | Trenton |
|---------------|--------------|
| 3 Total Miles | 1 Total Mile |
| \$450,000.000 | \$143,110.00 |

Project Efficiency

To reduce costs and ensure project success Trenton is proposing:

- Pulverizing the existing roadway
- Importing and placing road base, along with a 3 inch layer of asphalt.
- Trenton will be enlarging an existing storm drain run-off that failed this past spring.
- Trenton will contribute \$15000.00 toward the project out of previous year road allotment savings.
- Trenton's 2016 year road maintenance budget was \$46,467.00 to maintain 12.6 miles of road.

Project Key Notes

- This road is categorized as an arterial or collector road.
- This project is categorized as a roadway maintenance project.
- This project is located outside of the CMPO planning area.
- Engineering is not required for this project.

Project Conclusion

- Increased Safety
- Optimal use of tax dollars to maximize benefit for both Trenton residents and surrounding communities, and other county citizens (school buses, garbage trucks and emergency equipment).
- We are proposing to reconstruct an existing road there are no preliminary costs such as engineering, environmental, or right of way acquisitions. Good roads cost less to maintain, by having a reconstructed road Trenton will be able to avoid expensive maintenance costs for many years into the future.
- Every dollar of funding awarded will go to improving roads that benefit Cache County residents
