Cache County Council of Governments Road Funding (see Local Transportation Funds Program Manual at http://cachempo.org/?attachment_id=1508). Contact Jeff Gilbert (435) 755-1634 or jeff.gilbert@cachecounty.org for questions about this application. FULL APPLICATION (PART I & PART II) DUE BY 5:00 PM AUGUST 25, 2017. HOWEVER, PLEASE COMPLETE PART I BY JULY 31, 2017.

### PROJECT NAME

Eastern Gateway Street Improvements

### PROJECT SPONSOR

City of Mendon

### PROJECT MANAGER

Kirk Taylor

### PROJECT ELIGIBILITY

Basic eligibility requirements established by State Law or set by the Cache County Council of Governments.

### FUNCTIONAL CLASSIFIED BY UDOT

My project has been classified as an arterial or collector road (see http://arcg.is/XOnK0)

### CONSISTENCY WITH REGIONAL TRANSPORTATION PLAN (RTP)

My project is located outside the CMPO planning area (see http://cachempo.org/?attachment_id=13)

### PROJECT DESCRIPTION

### PROJECT CHARACTERISTICS

This is a Intersection improvement project

All project funds will go to advance purchase (construction out 10 years +) of road rights-of-ways

X This is a roadway maintenance project

**PROJECT ROAD NAME**

Eastern Gateway Street Improvements

**PROJECT DESCRIPTION**

Reconstruct and rehabilitate 500 North Street from the city limits easterly to to and through the intersection of 500 North and 100 East to the intersection of 400 North and 100 East to the right-of-way of SH-23. Work to include pulverizing existing asphalt, re-grading cross-section, compaction, widening 100 East and 400 North streets to city standard, relocating mailboxes and placing 3-inches of HMA pavement.
PART II--2017 COG ROAD PROJECT FUNDING
APPLICATION -DETAILED PROJECT INFORMATION

ENGINEERING DESIGN

BEGINNING IN 2018, FULL PROJECT ENGINEERING DESIGN WILL BE REQUIRED PRIOR TO CONSIDERATION FOR COG FUNDING (this requirement is waived for 2017). Sponsoring jurisdictions should use their own roadway standards when completing engineering design. The following are the only exceptions or other considerations: 1) A location specific roadway pavement design is required for construction of new roads or projects that include full depth road replacement. 2) Any project that includes a bridge or other roadway structure that costs in excess of $1 Million are required to obtain a plan review by the UDOT structures division.

ENGINEERING DESIGN

Concept or partial level project design has been completed

PROJECT COST

APPLICATIONS THAT RECEIVE LESS THAN THE REQUESTED COG AMOUNT WILL STILL BE REQUIRED TO PROVIDE LOCAL MATCH PROPORTIONAL TO WHAT IS INDICATED IN THIS APPLICATION.

ALTHOUGH NOT REQUIRED, USE OF UDOT'S CONSTRUCTION PROJECT COST ESTIMATING SPREADSHEET IS RECOMMENDED. THIS SPREADSHEET CAN MODIFIED WITH YOUR INPUTS. IT CAN BE DOWNLOADED AT: https://www.udot.utah.gov/main/uconowner.gf?n=7253831073072143

COG REQUESTED AMOUNT

$180,000

LOCAL MATCH AMOUNT (7% MINIMUM)

$20,000

MAKEUP OF LOCAL MATCH

</tbody>
</table>

PROJECT BETTERMENTS

The following elements of roadway construction are NOT eligible (some items may be used for local match) for COG fund reimbursement (these elements can be done as part of a COG funded project but
will need to be handled as separate bid items and paid with non-COG funds): 1. Curb, gutter or decorative landscaping (beyond that required for soil stabilization with native seeding). 2. Right of way cost beyond that needed to accommodate the actual road cross-section (the local jurisdiction must pay the cost difference of remnant property or full property “takes”). 3. Project design or COG application development costs. 4. Utility system upgrades. 5. Roadway lighting.

**ESTIMATED COST OF PROJECT BETTERMENTS (NOT ELIGIBLE FOR COG FUNDS)**

$4,500

**SHORT DESCRIPTION OF PROJECT BETTERMENTS**

Project concept design and COG application development costs

**RIGHT-OF-WAY ACQUISITION STATUS**

Project does not require the purchase of additional right-of-way

**PROJECT SCORING (CTAC CRITERIA)**

**TYPE OF CONGESTION RELIEF PROJECT**

**NOT A CAPACITY INCREASING PROJECT**

**ROADWAY CONGESTION RELIEF PROJECTS**

FOR HELP WITH CALCULATING THE VOLUME/CAPACITY RATIO FOR YOUR PROJECT, PLEASE CONTACT JEFF GILBERT (jeff.gilbert@cachecounty.org or 435-755-1634)

**ROADWAY'S EXISTING OR FUTURE (YEAR 2040) VOLUME/CAPACITY RATIO**

**ANTICIPATED PROJECT IMPROVEMENTS**

**INTERSECTION CONGESTION RELIEF PROJECTS**

**ANTICIPATED PROJECT INTERSECTION IMPROVEMENTS**

**CORRIDOR PRESERVATION**

Early purchase of road right-of-way is generally cheaper when done before development pressure encroaches and limits options. This scoring criteria incentivizes this by giving points to projects that are solely for corridor preservation.
IS YOUR PROJECTS ONLY PURPOSE TO PURCHASE RIGHT-OF-WAY FOR NEW ROAD CONSTRUCTION THAT IS MORE THAN 10 YEARS OUT?

No

ROAD SAFETY IMPROVEMENTS

Projects that include roadway safety improvements are incentivised through this scoring criteria. Since the scoring system uses a cost/benefit approach, lower cost (systemic) safety improvement are encouraged. Generally projects will need a strong safety improvement element that will address a known roadway safety issue to score points for this category. Higher cost general purpose roadway improvement projects will not likely score points for this criteria. This criterion uses a modified cost\benefit spreadsheet developed by UDOT to calculate a project cost/benefit. It can be downloaded at:  http://cachempo.org/?page_id=1510

SAFETY ANALYSIS COST/BENEFIT RATIO RESULTS

No analysis or ratio less than .25

PROJECT SCORING (COG MEMBER RANKING)

Each voting COG member will use the criteria described in this section to rank projects (ranked 1 to N, where “N” is the total number of projects and 1 represents the highest priority). COG staff will use the COG Members scoring key shown in Figure 3 in the approved COG Local Transportation Fund Program Manual (see http://cachempo.org/?page_id=1510) to convert the COG member’s project ranking to a weighted score. When ranking a project COG member will use their own best judgment about a project’s benefit by applying local knowledge and experience. However they are encouraged to use the following factors to evaluate project as part of their ranking evaluation (also required by State code).

PROJECT COST EFFECTIVENESS

RANKING CONSIDERATIONS COG MEMBERS MAY USE TO RANK YOUR PROJECT:

- What is the overall cost of a project relative to anticipated benefits.
- What is the local match contribution to the project?
- Does the project include donated right-of-way?
- Are all cost/contribution items listed for 7% local match minimum.
- Does the project include any In-kind contributions?
- Will the project include utility system upgrades?

BRIEFLY DESCRIBE YOUR PROJECT'S COST EFFECTIVENESS

Project costs will be used to remedy extensive fatigue cracking, widen asphalt surfaces to accommodate bicycle and pedestrian traffic more safely, and conduct structural rehabilitation in spot locations; all improvements will be completed within the existing right-of-way; and, Mendon City will provide $20,000 toward the project costs.
ECONOMIC IMPACT

RANKING CONSIDERATIONS COG MEMBERS MAY USE TO RANK YOUR PROJECT:

- Will the project support the expansion of commercial development in close proximity?
- Will the project include improvements to better support the movement of freight?
- Is the project located in an area with a high concentration of employment?
- Does the project support industrial and manufacturing development that bring wealth into Cache Valley (non-retail)?

BRIEFLY DESCRIBE YOUR PROJECT'S ECONOMIC IMPACT

The route is the primary corridor for providing east/west access from Mendon to Logan and is used by tractor-trailers, farm equipment, and recreational and competitive cyclists. This project is primarily being completed to increase pedestrian and cyclist safety, boost mobility within and through Mendon, and reduce roadway conditions that may contribute to, or amplify, accident risk.

MAINTENANCE & OPERATING COSTS

RANKING CONSIDERATIONS COG MEMBERS MAY USE TO RANK YOUR PROJECT:

- Does the project include any elements to reduce the cost of future operation and maintenance costs?
- Does the project include a follow up seal coat treatment?
- Will the project require long term city/county maintenance for adjacent remnant right-of-way?

BRIEFLY DESCRIBE YOUR PROJECT'S ONGOING MAINTENANCE AND OPERATING COST BURDEN

There are no extraordinary costs or savings created by this project; Mendon City will follow-up with a seal coat treatment in an effort to preserve the longevity of the improved roadway sections.

OTHER CONSIDERATION FOR PROJECT RANKING

BRIEFLY DESCRIBE OTHER FACTORS YOU WOULD LIKE THE COG TO CONSIDER WHEN RANKING YOUR PROJECT

100 East and 400 North will be widened to accommodate bicycle and pedestrian traffic; currently, these roads are too narrow for safe passage. Underground utility work will not be required.

ACCESS MANAGEMENT
Good road access management will control the number, location and design of access points (driveways and roads) on a given road corridor. If done correctly, it helps maintain the function and safety of the roadway (see https://ops.fhwa.dot.gov/access_mgmt/what_is_accsmgmt.htm). The COG would like to see appropriate long term access management carried out on roads they prioritized for improvements using COG funds.

ACCESS MANAGEMENT STATUS (FOR PROJECTS FUNDED IN EXCESS OF $200,000)

My project is requesting $200,000 or less of COG funding
