GENERAL NOTES

1. Cache County and the Engineer have jurisdiction over this project. Contractor shall obtain all necessary permits and business licenses prior to construction.

2. Contractor is responsible for dust abatement and any liability issues related to dust at any location which may be caused by the project.

3. The Contractor is responsible for traffic control, and protection of pedestrians in and around the work. Deviation of such control may be required for construction.

4. Any work done in a public right-of-way shall be coordinated with the appropriate traffic control agency and shall meet the requirements of that agency and, in particular, requirements of any right-of-way special use permit or other permit. All work shall meet current traffic requirements.

5. Where work is performed on cements, the contractor shall take every precaution to eliminate any adverse effects on the adjacent property and to repair it to its original condition.

6. All utilities and other utility supplies (e.g., gas, water, power, and telephone) are required for proper functioning of the work. The cost of such utilities shall be included in the appropriate bid item with which it is associated.

7. Construction shall be halted because of inclement weather conditions. All work shall be cleared up at the end of each work period and maintained in good condition during the shut-down period.

8. The Contractor’s personnel, equipment, and operations shall comply fully with all applicable standards, regulations, and requirements of existing federal, state, and local governmental agencies.

9. The Contractor shall be responsible for obtaining all local, state, and federal permits required for stormwater pollution prevention. The Contractor shall provide a Stormwater Pollution Prevention Plan for approval by the Engineer. At the construction site, one copy of the Stormwater Pollution Prevention Plan shall be available for public viewing. Contract for Stormwater pollution prevention (otherwise known as the construction permit) with the applicable agency.

10. The Contractor shall be responsible for obtaining all local, state, and federal permits required for stormwater pollution prevention. The Contractor shall provide a Stormwater Pollution Prevention Plan for approval by the Engineer. At the construction site, one copy of the Stormwater Pollution Prevention Plan shall be available for public viewing. Contract for Stormwater pollution prevention (otherwise known as the construction permit) with the applicable agency.

EXISTING UTILITIES

1. It is the responsibility of the Contractor to notify the appropriate utility companies when construction work interferes with normal operation of any utilities. It shall also be the Contractor’s responsibility to have the appropriate utility company field-locate any utility installations which would be affected by construction prior to beginning work in that area.

2. The Contractor shall be responsible for maintaining service of existing utilities and for restoring any utilities damaged due to construction at no additional cost to the owner.

3. Deflection and elevations of utilities are unknown unless otherwise shown. Contractor shall field verify utility locations, deflection, and elevations of any deflections and/or conflicts shall be brought to the attention of the Engineer immediately.

4. Not all utilities are shown on plans, including gas, phone, power, fiber optic, cable, etc. Only the lines for the culvert, water, sewer, and storm drain are shown.

INSPECTION AND TESTING

1. The Contractor shall be responsible for materials testing including but not limited to concrete, load, pressure, and composition. All tests shall meet minimum engineering requirements and the contract documents and drawings for frequency of testing. Results are to be submitted to the Special Inspector, Owner, and Engineer.

2. The Contractor is responsible to coordinate with Engineer and Special Inspector for inspections of work at appropriate intervals. A complete list of the Contractor’s responsibilities shall be at additional inspection that can be the result of his negligence.

CALL 2 BUSINESS DAYS IN ADVANCE BEFORE YOU DIG, GRABS, OR EXCAVATE FOR THE MARKING OF UNDERGROUND UTILITIES.
KEY NOTES:

1. ADJUST METER BOX
2. RELOCATE IRRIGATION "LINED OUT"

REMOVAL AND RELOCATION
3. REMOVE SIDEWALK
4. REMOVE PIPE GUTTER
5. REMOVE STORM DRAIN BOX
6. RELOCATE MAILBOX

ROADWAY
7. CONCRETE SIDEWALK
8. RESTORE GRAVEL LANDSCAPE
9. RECONSTRUCT MONUMENT BOX
10. UNTREATED BASE COURSE (PLAN QUANTITY) 4" THICK

DRAINAGE
11. 12 INCH STORM DRAIN RIFE
12. CATCH BASIN 3 FT X 3 FT
13. 12 INCH STORM DRAIN RIFE

NOTES:

1. UTILITY LOCATIONS ARE APPROXIMATE.

2. SEE C-500 SERIES SHEETS FOR DRIVEWAY AND INTERSECTION DETAILS.
KEY NOTES:
REMOVAL AND RELOCATION
X01 RELocate Sign
X02 REMOVE Tree

ROADWAY
X02 ROCK LINED CHANNEL 5 FT WIDE
X03 ROCK LINED CHANNEL 1 FT WIDE
X07 ROCK WALL

NOTES:
1. UTILITY LOCATIONS ARE APPROXIMATE. CONTRACTOR IS RESPONSIBLE TO VERIFY ALL UTILITIES.
2. SEE C-500 SERIES SHEETS FOR DRIVEWAY AND INTERSECTION DETAILS.
KEY NOTES:

REMOVAL AND RELOCATION:
- Remove concrete driveway
- Retest fence
- Relocate iron
- Relocate mailbox

ROADWAY:
- Rock lined channel, 7 ft wide
- Rocked out edge (edges)
- Untreated base course (plan quantity), 6" thick
- Concrete Flatwork, 4" thick

DRAINAGE:
- 12" inch storm drain pipe
- 12" inch flared end section
- 12" inch drain pipe

NOTES:
1. Utility locations are approximate.
2. Contact contractor to verify all utilities.
3. See C-500 series sheets for driveway and intersection details.
KEY NOTES:

REMOVAL AND RELOCATION

RB1 RELOCATE SIGN

ROADWAY

E2 ROCK LINED CHANNEL 1 FT WIDE
E3 RELOCATE GATE (G-RV)
E4 UNTREATED BASE COURSE (PLAN QUANTITY) 6" THICK
